DETAILED ACTION

1. This office action is a response to the restriction requirement filed on 6/12/2003.

Response to the Restriction Requirement

2. Applicant's election with traverse of Group I, claims 1-31 and 43-50, in Paper No. 6 is acknowledged. The traversal is on the ground(s) that no other method claim recites testing as a claim element. This is not found persuasive because even though there is no testing process in the claimed invention, the product as claimed can be made by another and materially different process such as applying a protecting coating to the head element prior to remove the head element from the housing of the disk drive.

The requirement is still deemed proper and is therefore **made FINAL**.

3. Claims 32-42 and 51-63 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 6.

4. Upon further consideration, restriction to one of the following inventions of elected claims is required under 35 U.S.C. 121:

- I. Claims 1-31, drawn to a method for reducing corrosion of a head element during rework operations, classified in class 29, subclass 603.03.
- II. Claims 43-50, drawn to a method for shipping a head element removed from a disk drive, classified in class 29, subclass 603.02.

5. Inventions Group I and II are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination (Group I) as claimed does not require the particulars of the subcombination (Group II) as claimed because the combination (Group I) as claimed does not require the particulars of the subcombination (Group II) such as transporting the container. The subcombination has separate utility such as a process of transporting.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

7. If applicant elects Group I, this application contains claims directed to the following patentably distinct species of the claimed invention:

Species A, drawn to claim 3.

Species B, drawn to claim 4.

Species C, drawn to claim 5.

Species D, drawn to claim 6.

Species E, drawn to claim 9.

Species F, drawn to claims 10, 12, 13, 18, 20, 22, 25 and 26.

Species G, drawn to claims 11, 14-17, 19, 21, 23, 24, 27 and 28.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 2, 7, 8 and 29-31 are generic claims to Group I.

8. If applicant elects Group II, this application contains claims directed to the following patentably distinct species of the claimed invention:

Species H, drawn to claims 44 and 48.

Species I, drawn to claims 45, 46, 49 and 50.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 43 and 47 are generic claims to Group II.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 3729

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

9. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Paul D Kim whose telephone number is 703-308-8356. The examiner can normally be reached on Tuesday-Friday between 7:00 AM to 5:30 PM.
